

Assignment : Playwright

Assignment 1: Launch a Browser and Open a Website

Task: Write a Playwright script to launch a browser, open a website, and take a screenshot.

```
test('Launch a Browser and Open a Website', async ({ page }) => {  
  
    await page.goto('https://demoblaze.com/index.html');  
  
    const title = await page.title();  
  
    console.log("Page Title: ", title);  
  
    expect(title).toBe("STORE");  
  
    await page.screenshot({ path: 'LaunchBrowser.png' })  
  
    await page.close();  
  
})
```

Assignment 2: Automate Login and Verify Dashboard

Task: Write a Playwright script to automate the login process and verify that a specific element is present on the dashboard after login.

```
test('Automate Login and Verify Dashboard', async ({ page }) => {  
    await page.goto('https://demoblaze.com/index.html');  
  
    await page.locator('#login2').click();  
  
    await expect(page.locator('#loginusername')).toBeVisible();  
  
    await page.locator('#loginusername').fill('Lakshmisri');  
  
    await page.fill('#loginpassword', 'Demo@123');  
  
    await page.locator('//button[@onclick="logIn()"]').click();  
  
})
```

```

    await expect(page.locator('#nameofuser')).toHaveText('Welcome Lakshmisri');

    await page.screenshot({ path: 'LoginVerification.png' });

    await page.close();

  })

```

Assignment 3: Handle Popups and Alerts

Task: Write a Playwright script to handle popups and alerts on a webpage.

```

test('Handling Simple Alerts', async ({ page }) => {

    await page.goto("https://testautomationpractice.blogspot.com/");

    await page.on('dialog', async dialog => {
        expect(dialog.type()).toBe('alert');
        expect(dialog.message()).toBe("I am an alert box!");
        await dialog.accept();
    })

    await page.locator("#alertBtn").click();

})

test('Handling Confirmation Alerts', async ({ page }) => {

    await page.goto("https://testautomationpractice.blogspot.com/");

    await page.on('dialog', async dialog => {
        expect(dialog.type()).toBe('confirm');
        expect(dialog.message()).toBe("Press a button!");
        // await dialog.accept();
        await dialog.dismiss();
    })
    await page.locator("#confirmBtn").click();

    const textValidation = await page.locator('#demo');

```

```

    // await expect(textValidation).toHaveText("You pressed OK!");

    await expect(textValidation).toHaveText("You pressed Cancel!");
  })

test('Handling Prompt Alerts', async ({ page }) => {

  await page.goto("https://testautomationpractice.blogspot.com/");

  await page.on('dialog', async dialog => {
    expect(dialog.type()).toBe('prompt');
    expect(dialog.message()).toBe("Please enter your name:");
    expect(dialog.defaultValue()).toBe("Harry Potter");
    // await dialog.accept('John Doe');
    await dialog.dismiss();
  })

  await page.locator("#promptBtn").click();

  const textValidation = await page.locator('#demo');

  // await expect(textValidation).toHaveText("Hello John Doe! How are you
today?");

  await expect(textValidation).toHaveText("User cancelled the prompt.");
})

test('handling popup window', async ({ page, context }) => {

  await page.goto("https://omayo.blogspot.com/");

  // Listen for the popup window
  const [popup] = await Promise.all([
    context.waitForEvent('page'), // Waits for the popup
    page.locator("//a[normalize-space()='Open a popup window']").click()
  ]);

  // Wait for the popup to load
  await popup.waitForLoadState();

```

```
// Now, locate the heading in the popup window
const text = await popup.locator("div[class='example'] h3").textContent();

expect(text).toContain('New Window');

})
```

Assignment 4 : Upload a File

Task: Write a Playwright script to upload a file using a file input element on a webpage.

```
test('Upload a File', async ({ page }) => {

    await page.goto("https://the-internet.herokuapp.com/upload");

    const file = 'C:/Users/Lakshmi Sri Akula/Downloads/Tax_Invoice-Jul-01-2025.pdf';

    await page.setInputFiles('#file-upload', file);

    await page.click('#file-submit');

    await expect(page.getByText('File Uploaded!')).toBeVisible();

    const uploadedFileText = await page.locator('#uploaded-files').textContent();

    await expect(uploadedFileText).toContain('Tax_Invoice-Jul-01-2025.pdf');

    await page.close();

})
```

Assignment 5 : Check for hyperlink Count on a Page

Task: Write a Playwright script to count the number of hyperlinks on a page.

```
test('Count Hyperlinks on a Page', async ({ page }) => {  
  
    await page.goto("https://the-internet.herokuapp.com/");  
  
    const links = await page.locator("#content a");  
  
    const linksCount = await links.count();  
  
    console.log(`Total number of links: ${linksCount}`);  
  
    await expect(await page.locator("#content a")).toHaveCount(linksCount);  
  
    page.close();  
  
})
```
